

Title: Application Developer

Pay: Competitive Salary

Location: Los Altos, California

Company description:

LCG Consulting is a R&D organization active in the energy sector. Situated at the center of Silicon Valley, LCG has a rich history of cutting edge model development to support our growing user base in the area of competitive analysis of power markets.

Job description:

LCG has an immediate opening for a highly motivated application developer. The successful candidate should be knowledgeable about software development practices, application maintenance, and customer support.

Responsibilities:

- Work on application development projects involving implementation, testing, and maintenance, which provide value to the company and the client base.
- Provide high level and in depth technical support by resolving client inquiries and product issues by phone, e-mail and web, in a manner and time frame consistent with company service levels and goals.
- Work collaboratively with clients, team members, and consultants to achieve desired results.
- Maintain detailed documentation through logging of support cases, e-mail and knowledge base Q&A for client and internal use.

Key requirements:

- Background in software development methodologies.
- Experience with SQL databases, .NET framework, C# and VB.NET in a highly professional environment.
- Experience in Agile Development is plus
- Excellent interpersonal skills and ability to work well within a team environment.
- Superior troubleshooting and analysis / resolution skills.
- Proven aptitude to learn complex technical and theoretical information quickly.
- Ability to prioritize and manage multiple complex issues and adapt to different challenges and changing priorities.

- Excellent written and verbal communication skills in English, with a strong attention to detail.
- Inquisitive and motivated.
- Independent working ability.
- Some travel to client sites may be required.
