

# ELECTRIC SYSTEM ANALYST AND MODEL DEVELOPER

**Skills:** System Analysis and Modeling

**Pay:** Competitive Salary

**Job Site:** Online or in Los Altos, California

**Job Description:**

LCG Consulting is an R&D organization active in the energy sector. Situated at the center of Silicon Valley, LCG has a rich history of cutting-edge consulting activities and model development to support our growing user base in the competitive analysis of power markets.

LCG has immediate openings for highly motivated system analysts and application developers. The successful candidate should have an advanced engineering/operation research degree, preferably knowledge of optimization techniques. In addition, some experience in Fortran will be an advantage.

**Responsibilities:**

- Participation in the end-to-end development of energy system simulation software.
- Support current development activities by creating energy applications for renewable energy and market operations.
- Interact productively with the LCG development team and clients.

**Key Requirements:**

- Strong computing and engineering skills
- Independent working ability
- Inquisitive and motivated
- Familiarity with optimization techniques and model development processes.

Send a resume and a cover letter indicating the job title, earliest availability, and expected daily rate to [info@energyonline.com](mailto:info@energyonline.com). Additional information about LCG and its R&D activities is available at our website, [www.energyonline.com](http://www.energyonline.com).
